

Mi4 Corporation

Oil & Gas Production Software

PRODUCTIONEER

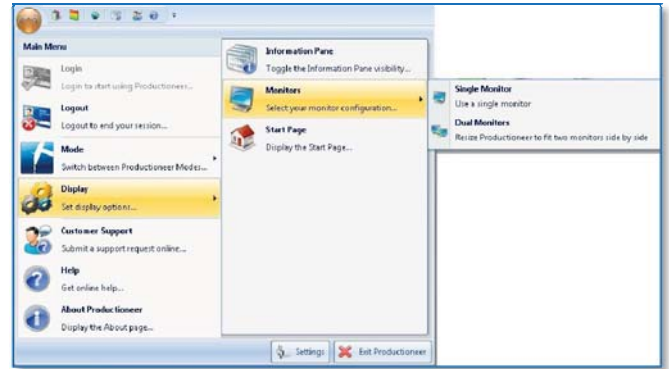

**Used by everyone from the field pumpers...
...all the way up to management**

Technology at work for you

CONNECTING YOU TO YOUR OILFIELD USING THE LATEST SOFTWARE TECHNOLOGY

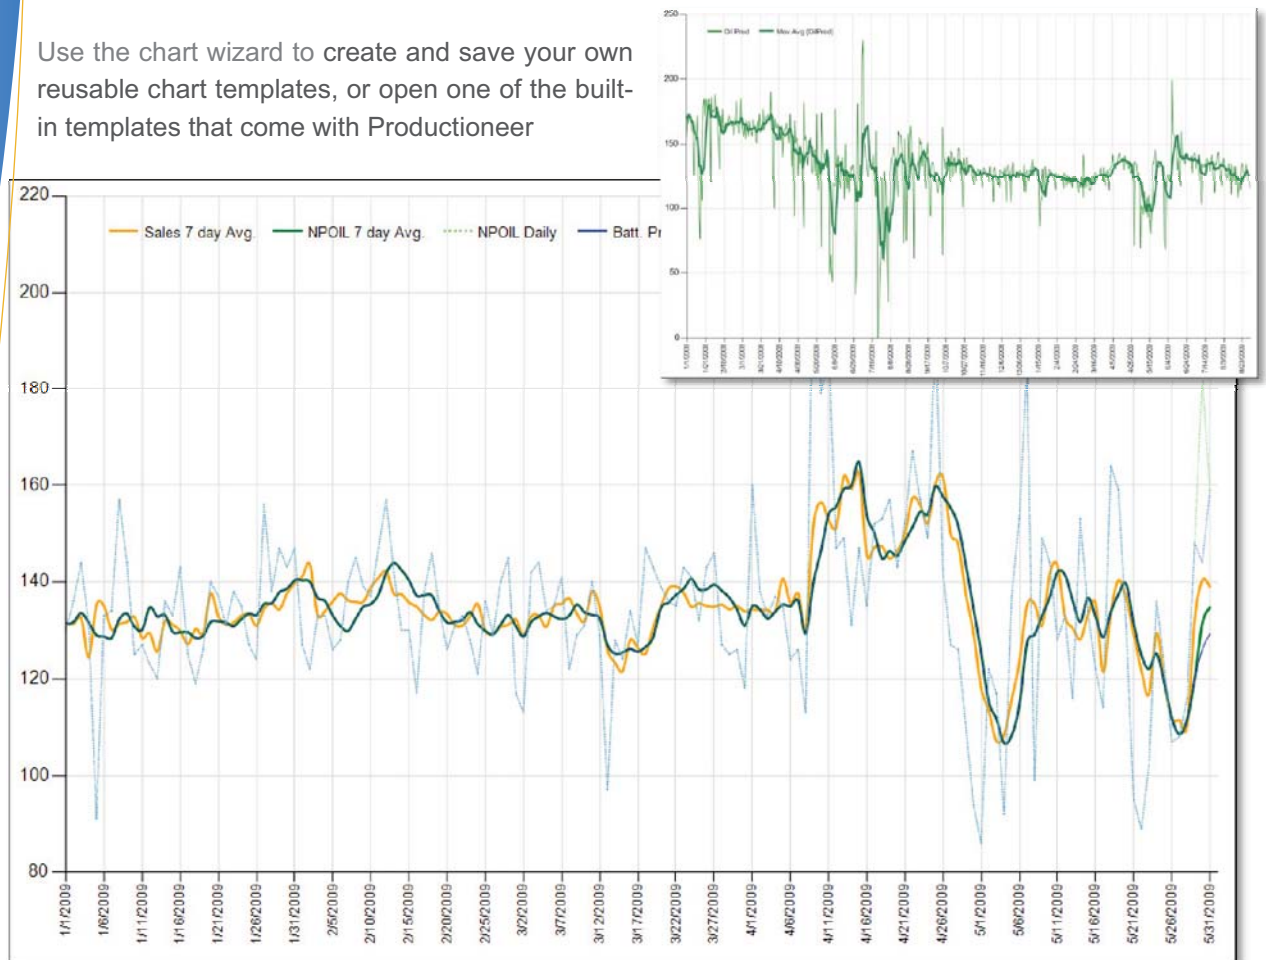

Productioneer is powerful and user friendly. The user interface is designed to be self explanatory and intuitive so less time is required to train your users. Mi4 puts all the latest tools at your fingertips. We believe in letting our users focus on doing what they do best. You don't need to become IT or Database experts to take full advantage of the software. Previously complicated tasks such as allocations are reduced to a few clicks of the mouse. Users can take advantage of the many built-in wizards to export or import data or create charts and reports.

CHARTS

Use the chart wizard to create and save your own reusable chart templates, or open one of the built-in templates that come with Productioneer

REPORTS

Productioneer is shipped with a variety of built-in reports, you can create your own, or Mi4 can create and customize them for you...

Monthly Sales Report

Gas Facility							
Oil Prod	Gas Sales	Gas Lift	Return Gas	Net Prod Gas	Purchased Gas	Fuel Gas	
s. will attempt to pump well # 621 today.							

ALLOCATIONS

We can custom build monthly allocation algorithms for each field or regulatory body. Existing templates include Louisiana, Texas and Mississippi.

Calculations that used to take hours or days now can be done in minutes.

Productioneer allocations take into account the special needs or situations that occur in different types of fields, for example:

- Comingled wells
- Facility, sale point or pipeline changes
- Frequency of test sampling
- Regulatory requirements by state

DOCUSHARE LINK

DocuShare by Xerox is a well established Document Management System. Mi4 Corporation, through a VAR license from Xerox DocuShare, provides turnkey integrated solutions that add electronic documents capabilities to your oilfield data. With DocuShare, you can manage files, emails, routing tasks, wikis, conversations and more, all of which can be linked to the related Well or Field entity in Productioneer.

Improve user performance “do more in less time”

RAPID R.O.I.

Thanks to Productioneer, our clients have shown an average time savings of 1 hour a day per user according to a 2008 user survey.

COMPLETE SOLUTION

Mi4 offers a full array of IT services including data management & migration, custom report creation, document management services, web services and third party software integration. And as usual, our Houston based customer support experts are always a click or a phone call away.

NEED MORE SUPPORT?

Mi4 can offer you a fully managed Productioneer solution. Let your users focus on doing what they do best and leave the rest to us. We can also augment your IT staff and provide you with comprehensive IT support.
